Policy Management ................................................................................................... 29
  Introduction to Policy Management ................................................................. 29
  Defining Policies ............................................................................................... 30
  Defining Procedures ......................................................................................... 30
  What is the Purpose of the Policy Process Area ............................................... 31
  Why and how this area Relates to IT Asset Management .................................. 31
  Why Policies are Important ............................................................................. 32
  Implementation Goals for Managing Policies ................................................... 32
    GOAL 1: Required IT Asset Management Policies are Effectively Implemented
    ......................................................................................................................... 32
    GOAL 2: Policies Must Be Enforced .............................................................. 33
    GOAL 3: Policies Are Reviewed and Updated Periodically............................. 33
Core Processes for Effective Policy Management ................................................. 34
  Team Building ................................................................................................... 34
  Implementing a Policy (Needs-Analysis) ............................................................ 34
  Review and Update Policy ................................................................................. 35
  Enforce all Policies .......................................................................................... 35
  Feedback ........................................................................................................... 35
  Commitments ..................................................................................................... 36
Capabilities ............................................................................................................. 37
  Policy Integration During Mergers and Acquisitions ......................................... 37
  Access and Visibility ........................................................................................ 37
  Sample Employee Acknowledgement ............................................................... 37
Recommended Policies for IT Asset Management ................................................ 37
Defining the Required Content and Structure ...................................................... 43
Communication and Education Process ............................................................... 45
  Introduction to Communication And Education .............................................. 45
  Definition of Communication and Education in ITAM ..................................... 46
  Purpose of the Communication and Education Process Area ........................... 46
  Why this Area Relates to IT Asset Management ............................................... 46
Implementation Goals for Communication and Education ................................... 48
  GOAL 1: Education Planning is Conducted for each ITAM Initiative or Project . 48
  GOAL 2: Training is Conducted as Defined in the Organization’s Approved
  Education Plan .................................................................................................. 49
## Table of Contents

**GOAL 3: Communication Planning is Conducted to Support the ITAM Program**
- Core Processes for Effective Education and Communication Management... 50
  - Education Planning............................................................ 50
  - Education Training Assessment............................................ 51
  - Communication Planning.................................................... 51
  - Communication Execution.................................................... 52
  - Commitments .................................................................. 52
  - Capabilities ................................................................... 53
  - Self-Assessment and Action Planning................................. 53
  - Defining the Required Content and Structure ....................... 55
  - Measurements and Verification Examples .......................... 55
  - Activities and Products .................................................... 56

**Project Management**.................................................................. 59
- Introduction to Project Management........................................... 59
- Definition of Project Management............................................... 59
- Purpose of Project Management.................................................. 59
- Why Project Management Relates to IT Asset Management........... 60
- Planning Process .................................................................. 60
- Implementation Goals for Project Management ......................... 61
  - GOAL 1: IT Asset Management Initiatives are Planned ........... 62
  - GOAL 2: IT Asset Management Initiatives are Monitored and Controlled 62
  - GOAL 3: Project Stage Reviews and Closure Activities are Conducted 63

**Core Processes for Effective Project Management**.......................... 63
- Measurements and Verifications Examples ................................ 65
- Activities and Products .......................................................... 66
- Project Management Planning and Tracking Example Mythical Industries 67
  - Project Management Template............................................ 67
  - Project Background ........................................................... 67
  - Within Mythical Industries..................................................... 67
  - Project Objectives ............................................................... 68
  - Project Scope .................................................................... 69
  - Project Deliverables ........................................................... 69
- Project Approach .................................................................. 70
  - Stage 1 – Project Initiation.................................................... 70
Table of Contents

| Stage 2 – Discovery and Assessment                                    | 73 |
| Stage 3 - Solution Development                                        | 75 |
| Stage 4 - Business Case Development                                    | 76 |
| Stage 5 - Technology Sourcing and Selection Process                  | 77 |
| Project Organization                                                  | 77 |
| Critical Success Factors                                              | 78 |
| Project Assumptions and Constraints                                   | 78 |
| Change Management Plan                                                | 79 |
| Change Management Process                                             | 80 |
| Risk Management Plan                                                  | 80 |
| Communication Plan                                                    | 82 |
| Elevator Pitch                                                        | 83 |
| Summary                                                                | 84 |
| Documentation Management                                              | 85 |
| Introduction to Documentation Management                              | 85 |
| Defining Documentation Management                                     | 86 |
| Purpose of Documentation Management Process Area                      | 86 |
| Why Documentation Management Relates to IT Asset Management           | 87 |
| Disaster Recovery                                                      | 87 |
| Implementation Goals for Documentation Management                     | 87 |
| GOAL 1: Asset Information is Maintained in a Centralized Repository   | 88 |
| GOAL 2: License Compliance is Assured                                | 88 |
| GOAL 3: Terms and Conditions are Defined and Understood              | 89 |
| GOAL 4: The Organization Can Recover From a Disaster and Continue Its Business | 89 |
| GOAL 5: Asset Status and Reporting Information is Available           | 90 |
| Commitments                                                           | 90 |
| Secure Storage and Disaster Recovery                                  | 90 |
| Capabilities                                                          | 91 |
| Change Management Reporting                                           | 91 |
| IT Asset Repository Technology                                         | 91 |
| Physical Security                                                     | 91 |
| Business Continuity                                                   | 92 |
| Self Assessment and Action Planning                                   | 92 |
| Measurements and Verifications Examples                               | 94 |
Table of Contents

Legislation ...............................................................................................................121
  Core Processes for Effective Legislation Management ........................................121
  Organizational Goals for Legislation Management .............................................121
  Introduction to Legislation ....................................................................................121
  Definition of Legislation ........................................................................................121
  Purpose of the Legislation Process Area ...............................................................122
  Why Legislation Relates to IT Asset Management ..............................................122
  Organization Has Awareness of Current Legislation ...........................................123
  Commitments .......................................................................................................123
  Self-Assessment and Action Planning ................................................................124
  Activities and Products .........................................................................................125

Vendor Management ...............................................................................................127
  Introduction to Vendor Management ...................................................................127
  Defining Vendor Management .............................................................................127
  Purpose of Vendor Management ..........................................................................127
  Why Vendor Management Relates to IT Asset Management ...............................127
  Implementation Goals for Vendor Management ..................................................128
    GOAL 1: The Organization Manages All Communication with its Vendors ....  128
    GOAL 2: The Organization Builds and Maintains Relationships with Vendors   through an IT / vendor Management Responsibility ........................................129
  Core Processes for Effective Project Management .............................................129
    The Vendor Manager is Trained to be Well versed in This Position ...............  129
    The Vendor Manager Learns to Build Relationships ....................................... 130
  Self-Assessment and Action Planning ................................................................131
  Measurements and Verifications Examples .........................................................134
  Activities and Products .........................................................................................134

Acquisition ...............................................................................................................137
  Introduction to Acquisition ..................................................................................137
  Definition of Acquisition ......................................................................................137
  Purpose of Acquisition .........................................................................................138
  How Acquisition Relates to IT Asset Management ..............................................138
  Implementation of IT Asset Goals ........................................................................138
    GOAL 1: Develop a Request and Approval Process ........................................  138
    GOAL 2: Develop and Maintain an Asset Selection Process ............................ 139
    GOAL 3: Develop and Maintain a Negotiations Process .................................. 141
### GOAL 4: Develop a Process for Defining Terms and Conditions ........................... 143

### GOAL 5: Develop a Redeployment Process ....................................................... 144

**Introduction to Procurement** ............................................................................. 145

**Definition of Procurement** ............................................................................. 145

**Purpose of Procurement** ................................................................................. 146

*Values Seen in the Procurement Process Include:* ............................................. 146

- Contractual Opportunities ............................................................................. 146
  - Volume Purchase Agreements ..................................................................... 146
  - Maintenance agreements ........................................................................... 147
  - Service Level Agreements ......................................................................... 149
  - Outsourcing Agreements .......................................................................... 150
  - Leasing ........................................................................................................ 150

**ANALYSING New Pricing Structures** ............................................................... 156

**Asset Identification Process** ........................................................................... 159

**Introduction to Asset Identification** ................................................................. 159

**Defining Asset Identification** ......................................................................... 159

**Purpose of the Asset Identification Process Area** ............................................ 159

**How Asset Identification Relates to IT Asset Management** ............................ 160

**Implementation Goals for Asset Identification** ............................................... 160

  - GOAL 1: Physical Asset Identification Strategy Must be Defined .................. 161
  - GOAL 2: Establish a Common Procedure for Receiving, Accepting, and...
  - GOAL 3: Security is Notified When a New IT Asset Enters the Environment ...
  - GOAL 4: All IT Assets are Discovered Through Physical Audit ................. 162

**Self-Assessment and Action Planning** .............................................................. 163

**Measurements and Verifications Examples** .................................................... 165

**Activities and Products** .................................................................................. 166

**Asset Identification Standards Example** ......................................................... 167

**Disposal Management** ................................................................................... 171

**Introduction to Disposal Management** ........................................................... 171

**Defining Disposal Management** ..................................................................... 171

**Purpose of Disposal Management** .................................................................. 171

**Why Disposal Management** ................................................................. 171

**Implementation Goals for Disposal Management** .......................................... 172

  - GOAL 1: The Organization Disposes Of Assets Legally and Securely .......... 172
Table of Contents

Goal 2: Asset Disposal Requirements Are Identified and Understood.........173
GOAL 3: Disposed Assets Are Accurately Tracked........................................173
GOAL 4: The End of Life Process Is Defined and the Disposal Procedures Are Implemented ....................................................................................................174
Goal 5: Software Is Harvested and Reallocated During the Disposal Cycle....175
Goal 6: Information Security for Disposed Assets Is Ensured......................175
Core Processes for Effective Disposal Management........................................176
Self-assessment and Action Planning .............................................................177
Measurements and Verifications Examples....................................................178
